Software developer with hands-on experience building production-grade AI applications, RAG pipelines, and full-stack systems. Over 2 years working across software development, cloud, and design. Proficient in Python, FastAPI, React, and cloud deployment. Passionate about applied AI and LLM integration. Currently based in Mannheim and pursuing an M.Sc. in Applied Computer Science at SRH University Heidelberg.

Projekte

DreamBot – AI-Powered Dream Interpretation bot ([Click here](#))

- Developed a full-stack AI chatbot that interprets user-submitted dreams using MistralAI.
- Integrated the Tavily Search API into a FastAPI backend to enable real-time dream interpretation from online sources, avoiding hardcoded symbols or static datasets.
- Built a dynamic React.js frontend with gradient-based, calming UI for enhanced user experience.

Orderbot – LLM-Powered Order management system ([Click here](#))

- Developed a production-style full-stack AI assistant leveraging FastAPI, React, and OpenRouter LLMs to process and interpret natural language order queries.
- Engineered LLM-driven parameter extraction logic to dynamically map user queries into structured backend database lookups.
- Designed and implemented SQLite-based order storage with structured API endpoints, demonstrating backend architecture, database handling, and AI integration.

RAG-based Personal AI Chatbot ([Click here](#))

- Designed and developed an AI chatbot using FastAPI (backend) and Streamlit (frontend) to answer user queries via RAG (Retrieval-Augmented Generation) architecture.
- Integrated minimax/minimax-m2.5 via OpenRouter API for LLM-based responses and used FAISS for efficient vector similarity search.
- Containerized the entire app using Docker and deployed using Render.

Erfahrung

11.2024 - Present

05.2024 - 11.2024

Self-Employed and Internships - Freelance projects and E-Commerce

Pushpam Ayurveda Wellness Centre

UI/UX Designer (Freelance)

- Conducted stakeholder interviews and gathered user requirements to align the design with patient and business needs.
- Contributed to a successful go-live, with the new website achieving a 40% improvement in average session duration within the first month.
- Supported the team throughout the development lifecycle, conducting design QA and recommending iterative UI/UX refinements, which led to a 20% faster user task completion time and improved overall site navigation efficiency.

12.2023 - 03.2024

Fähigkeiten

Baoiam Innovations Pvt Ltd

UI/UX Designer intern

- Worked on complete user research for the mobile app.
- Designed Low Fidelity wireframes for the app.
- Worked on the UI design and prototype of the mobile app.
- Conducted testing on the app design.

Programming & Scripting	- Python,Bash
Frameworks & Api's	- Flask, REST API Development & Integration, Streamlit
Frontend Development	- Html, CSS, Bootstrap,React.js
Testing & Automation	- Manual testing, API Testing, Test Automation, Pytest, Postman (API Monitoring)
Database & Vector Stores	- SQL, Postgress, FAISS, VectorDb
Cloud & DevOps	- AWS: EC2, S3, IAM, ELB, Git (Version Control), Docker, GitHub Actions,
AI	- Langgraph, Langchain, Agentic Ai, Tool calling, LLM APi's, RAG Architecture, SentenceTransformers, OpenRouter, Prompt Engineering
UI/UX Design	- Figma, Canva, Illustrator, User Research, Wireframing,Prototyping

Ausbildung

04.2026

Masters in Applied Computer Science

SRH University Heidelberg

08.2019 - 06.2023

Bachelors in Mechanical Engineering
SJB Institute of Technology VTU Bengaluru

7.9 Cgpa

06.2017 - 04.2019
